Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20, drawn to a method of making a nanosize ceramic powder.

Group II, claim(s) 21-25, drawn to a method of making a nanosize metallic powder.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the processes of each group are known in the art as shown by Sasaki '514 or Burgard '275 or Chow '230.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

CeO₂, rare earth doped CeO₂, ZrO₂, TiO₂, V₂O₅, Al₂O₃, Cr₂O₃, Pd

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument

Art Unit: 1754

that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-20 are directed to forming ceramic powders such as CeO₂, rare earth doped CeO₂, ZrO₂, TiO₂, V₂O₅, Al₂O₃, Cr₂O₃.

Claims 21-25 are directed to forming metal powders such as Pd.

The following claim(s) are generic: Claims 1 and 21.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each specie is drawn to a different compound or metal therefore each lacks the same special technical feature.
